eFacto™ slit master is an industry specific ERP software solution to manage complete life cycle of steel coil processing from large mother coil to smaller coils or sheets. The system is fully automated with the help of auto generated barcodes printed by system at the time of material receipt. It enables you to track and trace comprehensive inventory of your valuable customer laying with you.

Once mother coil is converted into desired coil or sheet and dispatched to your customer's location, the system takes care of your invoicing, excise, accounts receivables and statutory obligations.

- Unique batch and barcode generation based on mother coil no.
- Recode Excise input credit on material receipt and adjust credit in invoice.
- Complete tracking of customer stock/mother coil by batch and barcode

- Get unplanned coil list at a single click of mouse.
- Generate multiple plans for a single coil.
- Regenerate plan for WIP stock.

- Let the system calculate no. of packets and sheet per packet based on maximum weight & height defined by you.
- Generate unique location code, barcode for each packets of finished sheet or coil.
- Have more work than capacity, get it done from other service providers.

BNG Infotech is an indigenous IT services company that focuses to make business information simplified. The company has made its presence felt in the domestic ERP solutions market within 10 years of its incorporation. The company specializes in ERP solutions for

Manufacturing | Distribution | Transportation | Logistics | Warehousing |Retail
